Middle Mississippi River Regional Corridor Reach Reports

Published December 2009

The Middle Mississippi River Regional Corridor Reach Reports final document was developed and made available by the Southwestern Illinois Resource Conservation and Development (RC&D), 406 East Main, Mascoutah, Illinois 62258 under an agreement with the U.S. Army Corps of Engineers. The report was assembled by Stephen Black, Preston Lacy and Chris Slemph of the Southwestern Illinois RC&D. The report contains data, maps, and information developed by the U.S. Army Corps of Engineers, St. Louis District and many of the other agencies and organizations involved in the Middle Mississippi River Partnership.

The individual Reach Assessments for the five reaches were originally developed by a Reach Coordinator who was responsible for obtaining local input into the overall assessment and plan and for developing local information regarding current needs, conservation projects, and activities. The Reach Coordinators were:

Reach 1	Stephen Black	Southwestern Illinois Resource Conservation & Development (RC&D)
Reach 2	Brian Johnson	U.S. Army Corps of Engineers, St. Louis District
Reach 3	Jenny Frazier	American Land Conservancy
Reach 4	Steve Widowski	U.S. Forest Service, Shawnee National Forest
Reach 5	Dan Woolard	Illinois Department of Natural Resources

We want to thank all the agencies and organizations involved in the Middle Mississippi River Partnership for their cooperation and interest in making this report possible. Preparation of this final report would not have been possible without the help of many others in gathering, preparing, and developing the information, maps, and data that are contained in the final documents.

For additional electronic copies of the report on DVD, please contact the U.S. Army Corps of Engineers, St. Louis District, 1222 Spruce Street, St. Louis, Missouri, 63103-2833 or contact:
